

jQuery Plugins

Refresher

jQuery Script Tag

```
<script src="http://code.jquery.com/jquery.min.js"></script>
```

Refresher

CSS selector

```
$(".headline").doSomething();
```

jQuery

jQuery method

For plugins, add code AFTER jQuery

```
<script src="http://code.jquery.com/jquery.min.js"></script>
```

```
<script src="jquery.fancybox.pack.js"></script>
```

```
<script src="js/jquery.event.move.js"></script>
```

```
<script src="js/jquery.twentytwenty.js"></script>
```

Plugins create new jQuery methods

Methods build into jQuery proper

```
$(".mybox").fadeOut();
```

```
$(".mybox").hide();
```

```
$(".mybox").css("color", "blue");
```

New totally awesome jQuery method

```
$(".mybox").twentytwenty();
```

Twenty Twenty (Before After)

jQuery TwentyTwenty Plug | x

zurb.com/playground/twentytwenty

How it works

TwentyTwenty works by stacking two images on top of each other. As the slider moves across the image, it makes use of the CSS `clip` property to trim the image on the left. This allows the image on the right to show through the container.

We're using custom movement events from the [jquery.event.move](#) library in order to support 1:1 slider movement on mobile devices.

Setting up

It's easy to get started, just wrap two images inside of a container. The first image will be on the left and the second one will be on the right. Here's an example container:

```
<div id="container1">
  
  
</div>
```

Then call `twentytwenty()` on this container once the images have loaded:

```
$(window).load(function() {
  $("#container1").twentytwenty();
});
```

And voila!

Twenty Twenty

```
<div class="wide">  
  <div id="beforeafter" class="beforeafter">  
      
      
  </div>  
</div>
```

```
$(".beforeafter").twentytwenty();
```

Modal (Pop-up)

Add remodal plugin code

```
<link rel="stylesheet" href="jquery.remodal.css">
```

```
...
```

```
<script src="js/jquery-1.11.2.min.js"></script>
```

```
<script src="js/jquery.remodal.js"></script>
```

Add modal plugin code

```

```

```
<div class="remodal popup-up" data-remodal-id="modal34">  
    
</div>
```

jQuery Cycle Slideshow

Add jQuery Cycle plugin code

```
<script src="js/jquery-1.11.2.min.js"></script>  
<script src="js/jquery.cycle2.min.js"></script>
```

jQuery Cycle plugin

```
<div class="cycle-slideshow">
```

```
  
```

```
  
```

```
  
```

```
  
```

```
</div>
```

jQuery Cycle plugin

```
<div class="cycle-slideshow"  
  
    data-cycle-fx="scrollHorz"  
    data-cycle-timeout="0"  
    data-cycle-prev="#prev"  
    data-cycle-next="#next"  
  
>  
  
      
      
      
      
  
</div>
```

Video Tag

Video Tag

```
<video poster="assets/traffic.png">  
  <source src="assets/traffic.mp4" type="video/mp4">  
  <source src="assets/traffic.ogv" type="video/ogg">  
    
  
</video>
```
